SUMMARY

Full-stack developer since 2021: web apps, AI products and websites for US clients and global pharma. I build AI features end to end — chatbots, AI agents, MCP servers — on Next.js, Node.js and Firebase.

EXPERIENCE

Ditych — Full-Stack Developer

04.2026 – present · remote · agency with US clients

- **Flow Qualify** — built alone from scratch: a builder for multi-step funnels that embed on any website, with editor, dashboard, analytics and AI features on the Claude API. Next.js, TypeScript, Firebase, Vitest, Playwright. funnel-builder-one.vercel.app
- **AI products (NDA):** chatbots and AI assistants, AI agents built into products, MCP servers on the Claude and OpenAI APIs.
- **Framer websites** from designers' layouts, in a team: IQOSA, Melange, Eletho, Dalgona, TURI.
- **Also:** web apps with Stripe payments and dashboards, React Native apps, a telehealth website rebrand on Next.js and Contentful, support of Webflow and WordPress sites.

Viseven — Junior Frontend → Middle Full-Stack

03.2021 – 03.2026 · digital marketing for pharma

- **Middle Full-Stack** (09.2023 – 03.2026), project for a global biotech company: front end and back end on Next.js, Node.js, NestJS and Contentful; AWS; REST and GraphQL APIs; Docker, Jest.
- **Junior Full-Stack** (10.2022 – 08.2023), project for a global biotech company: Express back end on AWS (S3, Lambda, DynamoDB, CloudFront).
- **Junior Frontend** (03.2021 – 09.2022): AEM websites, a Vue project, contributions to eWizard, the company's content platform.
